

PERSONAL DETAILS

EMAIL

saibalajinamburi@gmail.com

PORTFOLIO

github.com/saibalaji

LINKEDIN

linkedin.com/in/saibalaji...

PHONE

+91 90107-49497

ADDRESS

University of Hildesheim, Hildesheim

WORK PERMIT

Student Visa (APS Certified)

AVAILABILITY

Up to 20 hrs/week

LANGUAGES

English IELTS 7 — Fluent

German A1 — Beginner
(actively learning, daily practice)

Telugu Native

TECHNICAL SKILLS

APPLIED AI & LLMs

Agentic AI (LangGraph)

RAG (Hybrid Search & Re-ranking)

Fine-tuning (QLoRA/PEFT)

Prompt Engineering

Evaluation (RAGAS, DeepEval)

LLMOps & INFRA

Kubernetes (K8s)

Jenkins/GitHub Actions (CI/CD)

Docker

Vector DBs (Qdrant, Milvus)

Monitoring (LangSmith, Arize Phoenix)

BACKEND & SYSTEMS

Python (Async)

FastAPI

Redis (Semantic Caching)

Pydantic

SQL/NoSQL

REST & WebSockets

Saibalaji Namburi

Master's Student – Data Analytics (AI Systems & LLM Engineering Focus)

Seeking Werkstudent / Internship Position in Applied AI / LLM Systems

ABOUT ME

Master's student in Data Analytics specializing in **LLM-based systems**, **RAG pipelines**, and **AI deployment**. Experience building and deploying end-to-end AI applications used by real users. Seeking a Werkstudent / Internship role in applied AI to contribute to production systems while strengthening engineering depth.

WHAT I BRING

Flexible Schedule — available weekdays, evenings & weekends, up to 20 hrs/week

Multilingual — English (fluent), German (learning)

Tech-Savvy — comfortable with computers, software, POS systems & digital tools

Customer-Friendly — experience communicating with end-users and gathering feedback

EDUCATION

04.2026 — Present

M.Sc. International Data Analytics

University of Hildesheim, Germany

Focus: Applied AI Systems, LLM-Based Applications, ML Systems

08.2021 — 07.2025

B.Tech in AI & Machine Learning

Saveetha School of Engineering, Chennai, India

GPA: 8.756 / 10 · Coursework: Deep Learning, NLP, Computer Vision, App Development

PRACTICAL EXPERIENCE

04.2024 — 03.2025

AI Application Developer — Internship

Saveetha School of Engineering, Chennai

- Built and launched a cross-platform mobile app (DentalSolutions) on Google Play — serving real users
- Owned backend development and deployment lifecycle for core features
- Deployed and maintained production AI features focusing on latency and reliability
- Gathered user feedback to improve the product
- Maintained data privacy and security standards across the application

PROJECTS

LLM / RAG

Retrieval-Augmented Generation Pipeline with Guardrails & Evaluation

- Implemented Hybrid Search (Vector + BM25) and Cross-Encoder Re-ranking using Qdrant & LangChain
- Developed confidence-based fallback mechanism: triggers Web Search when model confidence is low
- Integrated Redis Semantic Cache to reduce latency for recurring queries and optimize API token usage by ~40%
- Automated RAGAS evaluation tests within GitHub Actions CI/CD workflows to validate retrieval quality

Agentic AI

Multi-Agent System for Automated Research & Observability

- Engineered a Plan-and-Execute multi-agent architecture using LangGraph (Planner, Executor, & Supervisor nodes)
- Configured LangSmith for end-to-end trace observability to track complex workflow failures
- Optimized local inference for 7B parameter models using quantization (BitsAndBytes) on consumer hardware
- Orchestrated agent microservices on a local Kubernetes (Minikube) cluster

STRENGTHS

✓ Quick Learner

🕒 Punctual & Reliable

👥 Team Player

🔄 Adaptable
